New in Version 2.7

The following new features are available in Version 2.7 of the Web TimeSheet Integration Manager for Microsoft Project Std/Pro:

- **Support for Microsoft Project Std/Pro 2007**

The Integration Manager now supports integration between Web TimeSheet and Microsoft Project Standard/Professional 2007.

⚠ Microsoft Project Std/Pro version 2007 does not support Microsoft Project database files (.MPD files), therefore .MPD files cannot be used if you are integrating with Microsoft Project Std/Pro version 2007. However, if you are using Microsoft Project Std/Pro 2003/2002, you can still use .MPD files with the Integration Manager.

Fixed in Version 2.7

The following issues are fixed in Version 2.7 of the Web TimeSheet Integration Manager for Microsoft Project Std/Pro:

- Updates from Microsoft Project to Web TimeSheet can now be performed successfully (that is, without an error occurring) when **Update Project/Task Structure** is not selected, but one of the other update options is enabled. (54241)
- Billing status is now retained (that is, not reset to **Billable** for **Non-Billable** projects or tasks, or vice versa) for projects transferred from Microsoft Project. (49460, 47732)
- The Integration Manager now successfully transfers **Date**-type user defined field values from all versions of Web TimeSheet (including versions 6.7 and higher) to Microsoft Project. (49204)

Compatibility Chart

The table below indicates which versions of Web TimeSheet and Microsoft Project are required to work with this version of the Integration Manager.

Integration Manager File	Microsoft Project Version	Web TimeSheet Version
MSPStdProAdmin27.exe	Standard 2002, 2003, 2007	Version 6.7 Service Release 4 and higher
	Professional 2002, 2003, 2007
