Fixed in Version 2.5, Service Release 2

The following issues are fixed in Service Release 2 for Version 2.5 of Web TimeSheet Integration Manager for QuickBooks:

- When using the **Web TimeSheet Project/Task → QuickBooks Item/Sub Item** structural relationship, roles can be transferred as sub sub items. If a role is enabled for a user and that user is individually assigned to a task at the highest level of the project, the role will be transferred as an item below the task. If, desired, the assigned user can also be transferred as an item below the role. (54390)
- Expenses with no client or project selected are now transferred successfully when **Client/Project Code** is mapped to **Customer:Job**. (52121)
- Resolved issue that occurred when the name of a custom field in QuickBooks matched the name of a standard field (for example, a custom field labeled **Job Name**). (53503)

Compatibility Chart

The table below indicates which versions of Web TimeSheet and Intuit QuickBooks are required to work with this version of the Integration Manager.

Integration Manager File	Intuit QuickBooks Version	Web TimeSheet Version
QBIntegration25.exe	QuickBooks Pro or Premier U.S. Edition 2007, 2006, 2005, or 2004	Version 6.7 and higher
	QuickBooks Pro or Premier Canadian Edition 2007, 2006, or 2005	
	QuickBooks Enterprise Solutions U.S. Edition 7.0, 6.0, 5.0, or 4.0
