New in Version 4.0

The following new features are available in Version 4.0 of Web TimeSheet Billing Integration for QuickBooks:

- **Support for Integration with Web TimeSheet 8.2**

Version 4.0 of the Integration Manager is compatible with Web TimeSheet Project & Billing Edition version 8.2 or higher only. The following changes to the Integration Manager support integration with Web TimeSheet 8.2:

- The Integration Manager is now included with Web Timesheet, and can be installed from within the Web TimeSheet interface.
- Only time entries made against projects are transferred.
- Only users with permission to enter time against projects (that is, those who have *Allow time to be entered against projects* enabled in their permissions) are available for transfer.
- Only users with permission to enter expenses (that is, those who have *Enter Expenses* enabled in their permissions) are available for expense transfer.
- The **Hourly Cost** mapping has been removed.
- Each new user created in Web TimeSheet will be assigned *Project Resource – Billable* permission, if it is available, and *Timesheet* permission, if it is not.
- Users transferred to Web TimeSheet are given a Project & Billing seat. If both Project & Billing and Time & Attendance licenses are present in Web TimeSheet, users transferred from QuickBooks are given both seat assignments.

- **Optimization of loading in Customers and Job/Items transfers from QuickBooks to Web TimeSheet**

An **Exclude inactive customers** check box is now included with the **Customers** filter of the **Jobs/Items** transfer wizard. When enabled, inactive customers are filtered out. In addition, a **Reload** QB data button is now available on the filters page of the **Jobs/Items** and the **Customers** transfer wizards. When clicked, the filter displays any data that has been updated in QuickBooks, without the user having to restart the Integration Manager.

 If you are using the Web TimeSheet Integration Manager for QuickBooks for payroll purposes or for automatic client invoice generation, you should not convert to Web TimeSheet Billing Integration for QuickBooks as it is focused only on billing to ensure ease-of-use.

Fixed in Version 4.0, Service Release 2

The following issues are fixed in Service Release 2 for Version 4.0 of Web TimeSheet Billing Integration for QuickBooks:

- The Integration Manager now transfers projects with clients to Web TimeSheet with correct allocation percentage. (64061)

Fixed in Version 4.0, Service Release 1

The following issues are fixed in Service Release 1 for Version 4.0 of Web TimeSheet Billing Integration for QuickBooks:

- An error message now displays if you attempt to connect to an incompatible version of Web TimeSheet. The message gives information on downloading a compatible version.

Fixed in Version 4.0

The following issues are fixed in Version 4.0 of Web TimeSheet Billing Integration for QuickBooks:

- Users can now select **About**, then select x to close the window that displays, and then select **About** again without an error occurring. (62113)
