## Web Resource 1.1 Product Release Notes

---

Welcome to Web Resource 1.1. These Release Notes document the new features that appear in this version.

For further information on these or any other issues, contact Replicon Customer Service at:

Replicon, Inc.  
830, 910-7th Ave SW  
Calgary, Canada T2P 3N8

Telephone: 1-403-262-6519  
Toll Free (North America): 1-877-737-5420  
e-mail: info@replicon.com

### What's New in Web Resource

The following new features are included in Web Resource 1.1:

- Integration module for transferring Web TimeSheet users and projects into Web Resource.
- Common login facility where Web TimeSheet is able to maintain a single common password for both applications
- Improved calendar display resolution

## Integration Module for Web Resource 1.1

The Integrator is used to transfer resource and project data from Web TimeSheet to Web Resource. Provided as a separate executable, the module can be run from the Start Menu or scheduled on a regular basis from a command line. Each time the Integration is initiated, all resources, projects, and project personnel are transferred from Web TimeSheet to the equivalent representations in Web Resource. Common Login is also enabled for all resources created by this process.

## Common Login

Common Login allows Web Timesheet to authenticate login attempts for Web Resource. The user password for both applications is synchronized, as a single password is maintained for both applications by Web TimeSheet. Common Login is automatically enabled for resources created through the Integrator, and can also be enabled, or disabled, by editing the resource information within Web Resource.

## Calendaring Enhancements

Calendar displays now show accuracy to the nearest day in all views. This improved resolution improves the illustration of multiple bookings and other scheduling issues.
