

## Web Resource System Requirements

The system requirements for the Web Resource installation types are provided in the pages that follow.

| Installation type | System requirements can be found... |
|-------------------|-------------------------------------|
| Full version      | below                               |
| Trial version     | on page 2                           |

### Full Version

The full version of the installation requires an application server, a database platform, and client machines to access the system.

#### Server Requirements

The server on which Web Resource is installed must meet the following requirements:

##### Operating System

- Microsoft Windows Server 2003 (32-bit version only)
- Microsoft Windows Server 2008 (32-bit version only)

☐ Support for Windows Server 2000, Vista, and XP was discontinued as of version 2.11. If you want to purchase or upgrade to version 2.11 or higher but do not want to use Windows Server 2003 or 2008, contact [Replicon Support](#). They can set you up with Web Resource in our SaaS environment.

##### Hardware

###### Minimum:

- Pentium 500 MHz processor
- 512 MB of RAM
- 50 MB of hard disk space

###### Recommended:

- |                      |  |
|----------------------|--|
| Under 50 users:      | <ul style="list-style-type: none"><li>• Pentium 500 MHz processor</li><li>• 1 GB of RAM</li><li>• 50 MB of hard disk space</li></ul> |
| 50 to 200 users:     | <ul style="list-style-type: none"><li>• Pentium 1 GHz processor</li><li>• 1 GB of RAM</li><li>• 50 MB of hard disk space</li></ul>   |
| More than 200 users: | <ul style="list-style-type: none"><li>• Pentium 2 GHz processor</li><li>• 1 GB+ of RAM</li><li>• 50 MB of hard disk space</li></ul>  |

##### Other

- Microsoft .NET Framework 3.5
- Microsoft Internet Information Services 6.0 or higher

☐ Microsoft does not support or recommend installation of ASP.NET applications, such as Web Resource, on domain controller servers as their use is typically inconsistent with the security

expectations of the server. As a result, it is recommended that Web Resource is not installed on a domain controller server.

### Database Requirements

Web Resource requires one of the following database platforms be installed, either on the Web Resource server or a server accessible by Web Resource:

- Microsoft Desktop Engine (MSDE) 2000
- Microsoft SQL Server 2000 with Service Pack 4 or higher
- Microsoft SQL Server 2005
- Microsoft SQL Server 2005 Express (installed automatically, if selected)

☐ If you use Microsoft SQL Server, you must run your database using “mixed mode” Windows and SQL Server Authentication.

Web Resource cannot be installed on Mac or Linux/Unix operating systems.

### Client Requirements

Each PC being used to access the Web Resource system must meet the following requirements:

#### *Operating System*

One of the following:

- Microsoft Windows 98
- Microsoft Windows ME
- Microsoft Windows NT
- Microsoft Windows 2000
- Microsoft Windows XP
- Microsoft Windows Vista
- Microsoft Windows Server 2003 (32-bit only)
- Microsoft Windows Server 2008 (32-bit only)

#### *Hardware*

Minimum:

- Pentium 500 MHz processor
- 512 MB of RAM
- 1024 x 768 monitor resolution

#### *Software*

One of the following:

- Microsoft Internet Explorer 7, 8, or 9
- Mozilla Firefox 6.0 or 7.0

### Trial Version

The trial version of the installation does not require a server machine – it can be installed on a local computer (the host). The Microsoft SQL Server Express platform is automatically installed and used by the trial program.

Any client machines used to access the trial version must meet the requirements outlined in [Client Requirements](#) on page 2.

## Host Requirements

The computer on which the trial version is installed must meet the following requirements.

### Operating System

- Microsoft Windows Server 2003 (32-bit version only)
- Microsoft Windows Server 2008 (32-bit version only)

☐ Support for Windows Server 2000, Vista, and XP was discontinued as of version 2.11. If you want to purchase or upgrade to version 2.11 or higher but do not want to use Windows Server 2003 or 2008, contact [Replicon Support](#). They can set you up with Web Resource in our SaaS environment.

### Hardware

Minimum:
