New in Version 2.9

The following new features are available in Version 2.9 of Web Resource:

- **Support for Integration with Web TimeSheet 8.5**
Web Resource 2.9 supports integration with Web TimeSheet version 8.5, Project & Billing Edition.
- **Improved Usability of Resource List**
On the **Edit Project** page, the **Resource** list on the **Task Assignments** tab is now wider, and can be sorted.
- **Project Type and Project Status data is now listed for each project on the List Projects page**

Fixed in Version 2.9

The following issues are fixed in Version 2.8 of Web Resource:

- When the user leaves the **End Date** field on the **Project** tab of the **Web TimeSheet Integration** page blank and exits the page, it no longer displays the date 12/31/9999 when the user returns to that page. (63496)
- **Resource**, **Supervisor**, and **Project Manager** default permission profiles are now available, in addition to the **Admin** profile, when users install Web Resource using Integrated Windows Authentication. (63675)
- The percent allocation values in the **Resource Workload** report now correctly display to two decimal places. (63533)
- Time off, such as weekends, is no longer erroneously included when users use the slide functionality to adjust project dates. (52940)
- The **Resource Name** filter will now filter names entered in a `lastname firstname` (with no comma) format. (63464)
- Fixed performance issue that affected reports that used the allocation calendar. (64118)

- An error no longer occurs when the user selects filters that deliver no data for the **Resource Details** report Excel export. (64052)
- When those using Internet Explorer 6.0 edit project resources, attempt to navigate away from the edit page, and then select Yes from the **Save Changes** prompt that displays, all changes are now saved (not just the last change). (64001)
