

Web TimeOff System Requirements

Version 2.4

Before installing Web TimeOff ensure your system meets the following requirements, depending on the version you plan to install.

Demonstration Version

The following is required to install and run the demonstration version.

Server Requirements

A server is not required for the demonstration version. A built-in web server is included with the installation.

Database Requirements

A database platform is not required for the demonstration version. The Microsoft Access platform is built-in and an Access database will be automatically created.

Client Requirements

The computer the demonstration version of Web TimeOff is being installed on must meet the following requirements:

Operating System (one of the following)

- Microsoft Windows 98
- Microsoft Windows ME
- Microsoft Windows 2000 with Service Pack 4 or higher
- Microsoft Windows Server 2003
- Microsoft Windows XP Professional with Service Pack 2 or higher (32-bit version only)
- Microsoft Windows XP Home with Service Pack 2 or higher

Hardware

Minimum:

- Pentium 500 MHz processor
- 256 MB of RAM
- Screen resolution of 1024 x 768

Recommended:

- Pentium 500 MHz processor
- 512 MB of RAM
- 50 MB available disk space
- Screen resolution of 1024 x 768

Software

- Microsoft .NET Framework 2.0
- Microsoft Data Access Components (MDAC) 2.6 or higher

 When installing Web TimeOff for the first time, the installer will check for existing installations of .NET Framework and MDAC. If either is missing, the installer will automatically download and install them as part of the installation process.

Internet Browser (one of the following)

- Microsoft Internet Explorer 5.5 or higher (6.0 or higher recommended)
- Mozilla Firefox 1.0 or higher

Other

- Access to an SMTP-compliant e-mail server (required for e-mail notification support)

Full Version

Server Requirements

The server on which Web TimeOff is installed must meet the following requirements:

Operating System (one of the following)

- Microsoft Windows 2000 with Service Pack 4 or higher
- Microsoft Windows Server 2003
- Microsoft Windows XP Professional with Service Pack 2 or higher (32-bit version only)

Hardware

Minimum:

- Pentium 500 MHz processor
- 512 MB of RAM
- 50 MB available disk space

Recommended:

| Number of Users | Requirements |
|-----------------|--|
| Under 50 users | <ul style="list-style-type: none">• Pentium 500 MHz processor• 1 GB of RAM• 50 MB available disk space |
| 50 to 200 users | <ul style="list-style-type: none">• Pentium 1 GHz processor• 1 GB of RAM• 50 MB available disk space |
| Over 200 users | <ul style="list-style-type: none">• Pentium 2 GHz processor• 1+ GB of RAM• 50 MB available disk space |

Software

- Microsoft .NET Framework 2.0
- Microsoft Internet Information Services (IIS) 5.0 or higher
- Microsoft Data Access Components (MDAC) 2.6 or higher
- ASP.NET (if using machine running Microsoft Windows Server 2003)

When installing Web TimeOff for the first time, the installer will check for existing installations of .NET Framework and MDAC. If either is missing, the installer will automatically download and install them as part of the installation process.

Other

- Access to an SMTP-compliant e-mail server (required for e-mail notification support)

Database Requirements

Web TimeSheet requires **one** of the following database platforms be installed, either on the Web TimeOff server or a server accessible by Web TimeOff. If using a separate database server, the server should meet the same requirements as for the application server.

- Microsoft Desktop Engine (MSDE) 2000
- Microsoft SQL Server 2005 Express
- Microsoft SQL Server 2000
- Microsoft SQL Server 2005

Client Requirements

Each PC being used to access the Web TimeOff system must meet the following requirements:

Operating System (one of the following)

- Microsoft Windows 98
- Microsoft Windows ME
- Microsoft Windows 2000 with Service Pack 4 or higher
- Microsoft Windows Server 2003
- Microsoft Windows XP Professional with Service Pack 2 or higher
- Microsoft Windows XP Home with Service Pack 2 or higher

Hardware

Minimum:

- Pentium 500 MHz processor
- 256 MB of RAM
- Screen resolution of 1024 x 768

Recommended:

- Pentium 500 MHz processor
- 512 MB of RAM
- 50 MB available disk space
- Screen resolution of 1024 x 768

Internet Browser (one of the following)

- Microsoft Internet Explorer 5.5 or higher (6.0 or higher recommended)
- Mozilla Firefox 1.0 or higher
