### Fixed in Web TimeSheet 5.7 SR1

The following previously known issues are fixed in Web TimeSheet 5.7 SR1.

Module	Description of Fixed Issue
Administration	<p>36240</p> <p>If a time off code balance is negative, the Allowed Balance on the User Profile/Time Off page is blank.</p> <p>36150</p> <p>When setting up a department, the hierarchy of the department was displayed incorrectly after adding a user.</p> <p>34893</p> <p>Names containing an apostrophe (e.g. O'Donnell) are not found when doing a User Group Find.</p> <p>34692</p> <p>The User Rate field in the mass edit team page was too small.</p>
Approvals	<p>35425</p> <p>When attempting to set up approval paths, the first level approval was being duplicated.</p>
Data Import	<p>35615</p> <p>The data import engine returned an error when performing data migration.</p>

Module	Description of Fixed Issue
ProMax	<p>36222</p> <p>All disabled users were displayed in ProMax Productivity Reports. Disabled users are now only displayed if they have billable, non-billable, or time off balances, or if they have a productivity target.</p> <p>36221</p> <p>All disabled users were displayed in the ProMax dashboard. Disabled users will now only be displayed if they have entered a time for that period, or if they have a productivity target.</p>
QuickBooks IIF Integration	<p>35481</p> <p>When an IIF file was being created for import, weeks of time were being separated from client name.</p>
Reports	<p>37024 &amp; 34464</p> <p>The User name output provided from Project raw data report and Timesheet raw data report differed in format, making it difficult to join the data in external data bases.</p> <p>37018, 35611, &amp; 36745</p> <p>A server error was returned when attempting to run a Project Raw Data report</p> <p>36462</p> <p>When a Private Report was generated from a Detail Task User Report, the information for individual users was different from the original Detail Task Report</p> <p>36339</p> <p>When a Timesheets Awaiting Approval report was generated, the Time Off column displayed the incorrect number of hours.</p> <p>36308 &amp; 36462</p> <p>When a Project Detailed Task Report was run, the Grand Total was incorrect.</p> <p>35941</p> <p>The Raw Data Timesheet Report listed incorrect data for billable hours.</p> <p>35772</p> <p>Some check boxes were grayed out when using the Project Status Summary report.</p>

Module	Description of Fixed Issue
Reports (continued)	<p>35614 A server error was returned when running a Project Summary Report</p> <p>35528 Zero hour task rows were not being shown when certain filters were being applied.</p> <p>34294 A cgi timeout error was sometimes returned when complex report queries were run.</p>
System	<p>37143 A server error was generated when permissions were changed.</p> <p>35701 A JavaScript error was returned when the Microsoft Office XP Web Component Administrative Installation Point was entered in System Preferences.</p> <p>35298 When attempting to upgrade the database from a previous version, a fatal error was returned.</p>
Timesheet	<p>37578 &amp; 37328 The Timesheet comments drop-down box did not display the full project/task path.</p> <p>36725 The Project Name could not be viewed if In/Out time was logged at a project level only.</p> <p>36171 The Add/Remove task screen was not displaying the Project Name. The task selector pop-up now displays the full Project/Task path.</p> <p>36124 Negative numbers containing two digits before and two digits after the decimal point could not be entered.</p> <p>36006 A JavaScript error was returned when attempting to open a historical timesheet with a not-submitted status.</p>

<b>Module</b>	<b>Description of Fixed Issue</b>
Timesheet (continued)	34115  Some users were unable to save their timesheets because the timesheet was attempting to use entries that did not belong to that timesheet.
Web Timesheet and SiteMinder	36166  Users who accessed Web Timesheet through SiteMinder were automatically logged out immediately after clicking the Enter button on the Web Timesheet login screen.
