What's New in Web TimeSheet 6.2

The following new features are available in Web TimeSheet version 6.2:

- **Timesheets can be set up to use overtime rules**
 Timesheets can now be set up to use different rate rules for individual users. This feature is designed to accommodate customers who require overtime calculations, rate adjustments, and minimum/maximum hours in users' timesheets.
- **Improved handling of multiple clients**
 The method of incorporating projects with multiple clients has been improved making it easier to use this feature. Client information is now displayed in only one Client column on the timesheet. In addition, for users who have no need for the multiple client functionality, the timesheet behaves in the way it did before multiple client features were added.

Fixed in Web TimeSheet 6.2

The following previously known issues are fixed in Web TimeSheet 6.2.

Module	Description of Fixed Issue
Browser	<p>41510</p> <p>Some browsers were not displaying Web TimeSheet screens correctly.</p> <p>36744</p> <p>After upgrading Web TimeSheet to a new version, the browser cache had to be cleared before the timesheet would appear.</p>
