Fixed in Web TimeSheet 6.2 SR 1

The following previously known issues are fixed in Web TimeSheet 6.2 SR 1.

Module	Description of Fixed Issue
Approvals	CR 44149 The Approvals screen was not showing numbers in the format specified by the user's Configuration settings.
E-mail Notifications	CR 42892 When sending the Timesheet Overdue email notification, the notification was not being sent on employees' weekly days off.
Expense	CR 42755 Loading the expense sheet took up to 3 minutes.
Expenses	CR 43650 Loading the expense sheet took up to 45 seconds.
Import Engine	CR 43587 When importing user information into Web TimeSheet, an error was returned when the Import Engine validated a user defined field.
Import Engine	CR 43646 The documentation for the Import Engine listed the field name for Project Code as ProjectName, when it should have been ProjectCode.
Import Engine	CR 43680

Module	Description of Fixed Issue
	When importing user information, certain e-mail notifications inserted in the command string were causing the import to fail.
Migration	CR 43624 When migrating to Web TimeSheet 6.2, a SQL error was returned in the migrator.log file.
Projects	CR 43608 Modifying tasks returned a server error caused by improper handling for fields containing null values instead of zeroes.
ProMax	CR 43325 The Launch ProMax icon was showing incorrectly or missing altogether after installation.
QuickBooks IIF	CR 39681 When exporting data from Web TimeSheet to a client invoice, the project and task names were not displayed in the export report.
Reports	CR 43561 Exporting the Timesheet Billing report to MS Excel removed the grouping options and formatting that were selected in the online report.
Reports	CR 44024 Timesheet level user defined fields were not totaled in the Timesheet Detail report when one or more time off rows were present in the timesheet.
System	CR 43769 When accessing Web TimeSheet through https/iis, a Windows Security Alert appeared, notifying the user about leaving a secure internet connection.
System Preferences	CR 44057 A JavaScript error occurred on the System Preferences screen as a result of invalid characters in POP3 fields.
Time Off Request	CR 43759 When an approver rejected a time off request by accident and clicked "Cancel" on the Approval Comments window to cancel the rejection, an error was returned which prevented the approver from then approving the time off request.
Time Off Request	CR 43291

Module	Description of Fixed Issue
	Canceling an approved time off request did not remove the time off hours from the timesheet, even though the timesheet had not yet been submitted for approval.
Timesheet	CR 43475 After selecting projects and tasks using the Add/Remove Tasks screen, the timesheet was sometimes showing the task name in place of the project name.
Timesheet	CR 43571 When saving the timesheet, a server error was returned due a problem in user defined fields, where spaces existed in numeric fields.
Timesheet	CR 43622 Loading the timesheet took 12 minutes when there were more than 200 clients per project using the bucket method.
Users	CR 43742 When using the "Based On" option in the user Quick Add, the correct Hours Per Day value was not being copied to the new users.
