Fixed in Version 6.7, Service Release 5

 To better reflect the improvements we have made since the last release of Web TimeSheet, we are now providing a more comprehensive list of the issues fixed between releases.

The following issues are fixed in Service Release 5 for Version 6.7 of Web TimeSheet:

- Issue that caused a Page cannot be displayed message to appear when the user selected the **Email Notification** link is fixed. (48585)
- Issue that caused a runtime error to occur when the user selected the **Update** button when editing an entry in a drop-down user defined field is fixed. (48777)
- Issue that prevented submitted offline expense sheets from being received is fixed. (48996)
- Issue that allowed users to save **California** and **Bi-Conditional** overtime rules even when the required **Rules** field was left blank is fixed. (49604)
- Issue that caused comments to be cut off the **Timesheet Billing** report is fixed. (49719)
- Issue that allowed users to add time off hours or days or both to approved time off requests is fixed. (49753)
- Issue that caused an error to occur when a timesheet-level user defined field containing an ampersand symbol (&) was set as Default is fixed. (49844)
- Disclaimer box can now save up to 4000 characters of text. (49944)
- Issue that caused the **Expense Details** window to lose focus when a rate column was added dynamically is fixed. (50154)
- Performance issue that arose after the user sent an offline timesheet or expense sheet has been addressed. (50532)
- Issue that prevented **Project Status Detailed (Expense User)** report from generating is fixed. (51519)
- Issue that prevented an approved timesheet from displaying on the **Timesheet Approval History** page after migrating from Web Timesheet 4.5 (Access) to 6.7 is fixed. (51553)

- Issue that caused an error to occur when a user attempted to integrate Web TimeSheet with Web Resource is fixed. (51647)
- Issue that prevented users from adding **Row Level** or **Hour Level** user defined fields for time off entries via the import engine is fixed. (52053)
- Performance issue that arose when the user added a project to Web TimeSheet has been addressed. (53608)
- Issue that caused a runtime error to occur when the user opened an expense that was waiting for approval is fixed. (54237)
- Issue that caused an error in migration from Oracle to Access when using the Virtual Migrator is fixed. (49909)
- Issue that caused a server error to occur when the user attempted to generate PDF versions of reports is fixed. (54264)
