Fixed in Version 7.1, Service Release 2

 To better reflect the improvements we have made since the last release of Web TimeSheet, we are now providing a more comprehensive list of the issues fixed between releases.

The following issues are fixed in Service Release 2 for Version 7.1 of Web TimeSheet:

Admin

- Default values for drop-down user defined fields now display on **Add New User** page. (50179)
- Holidays can now be created without assigning an icon. (52608)
- Runtime error no longer occurs when the user attempts to save the **Due/End Dates** page containing blank data fields. (52616)
- Runtime error no longer occurs when the user attempts to edit multiple users from the **Users** page. (51849)
- Server error no longer occurs when deleting a currency type that was assigned to a user's hourly payroll. (52359)
- Server error no longer occurs when deleting an overtime rule. (52293)
- Only assigned departments are displayed in the **Based On** pop-up window accessed from the **Quick Add** page. (51510)
- Error no longer occurs when the user clicks the **Save** button twice when adding new users via **Quick Add**. (52625)

Project

- Issues involving display of project notes have been resolved. (52454, 52536)
- Department names containing Unicode characters are now displayed correctly on the **Project Assignments** page. (51946)

- If the user does not have permission to view projects, a page appropriate to their permissions will now be displayed when **Projects** is selected from the top menu. (51722)
- The project leader's name now displays on the **Project** page for external users. (51603)
- Users can now successfully search for projects using a numeric user defined field. (51604)
- **Project/Task** text user defined fields now show correct saved data when viewed by users with *View* permission only. (52652)
- If the **Manage Another Team Member** check box is enabled before the user confirms changes to a team member's assignment, the new **Manage Team Member** page now consistently displays correctly. (52228)
- **Default Billing Rate Description** on the **Edit Clients** page now saves successfully. (52187)

Timesheet

- Runtime error no longer occurs when the user re-submits a timesheet with an unmet validation rule. (52465)

Approvals

- When logged in as an external user with the appropriate permissions, the **Timesheet** menu items are now provided in the **Approvals** menu. (52276)

Reports

- After upgrading from Web TimeSheet 6.x, the *<no client>* grouping now appears in all Classic reports that include a client filter. (52568, 52441, 52440, 52437, 52436, 52435, 52434, 52438, 52569, 52083)
- Fixed exception error encountered in Classic reports with a **User** selection menu when using Oracle database. (52367)
- Errors resulting from the generation of select Classic and Dynamic reports have been resolved. (52279, 52786, 52694, 52460, 52488, 52450, 52564, 52198, 52633)
- Billable hours for users with multiple departments are no longer being multiplied by the number of assigned departments in the **Project Status Detail (Task-User)** report. (52817)
- Hours data is no longer doubled when a **Sum** is enabled for all applicable columns is selected in the **User Hours Details** Dynamic report. (52596)
- Multiple Classic reports can now be run simultaneously without an error occurring. (52694, 52460)
- Report descriptions with multiple lines no longer affect loading of the **Manage Reports** page. (52231)
- **User Details** Classic reports now retain existing departmental groupings after upgrade. (52410)
- Performance issues involving the generation of Classic reports have been resolved. (52888)

Upgrading, Installing, and Importing

- Identified errors encountered when upgrading from previous versions of Web TimeSheet have been resolved. (52116, 51648, 51994, 49905)
- The Web TimeSheet installer now supports NT Authentication for MSDE/SQL database connectivity. (52352)

- The SYSTEM_ERROR e-mail notification is now recognized when importing users. (52787)

Miscellaneous

- Issues involving assigning users with module seats have been resolved. (52782)
- Re-introduced default ordering in Classic reports, and in the ProMax and Expenses modules. (52696)
- Error messaging has been improved. (52695, 52709, 52487, 52024, 51644, 51640)
- Fixed error in e-mail notification for expense approver overdue notices. (52709)
- Names and fields containing an ampersand symbol (&) now display and function correctly. (52151, 52160, 51676, 49340)
- Users using NT Authentication are no longer required to change their password after editing their own user profile or if they were added via the import engine. (52650, 52366)
- Issues involving the display and closing of pop-up windows in both Internet Explorer and FireFox have been resolved. (43128, 51327, 52258)
