Fixed in Version 7.1, Service Release 3

The following issues are fixed in Service Release 3 for Version 7.1 of Web TimeSheet:

- Web TimeSheet Integration Manager for QuickBooks no longer fails to transfer data for certain timesheet periods. (53141)
- The *hierarchytaskname* field now updates correctly when importing projects/tasks using Web TimeSheet Integration Manager for Microsoft Project, Web TimeSheet Integration Manager for Quickbooks, or Web Resource. Incorrect *hierarchytaskname* causes issues with task hierarchy structure and Billing reports for imported projects/tasks. (53006)
- Error that involved saving a timesheet that contains projects/tasks, when the user was assigned to a project through department assignments only, no longer occurs. (53104)
- Data from a timesheet in Web TimeSheet can now consistently be transferred to a corresponding timesheet in QuickBooks without an error occurring. (53088)
