### What's New in Version 2.6

The following new features are available in Version 2.6 of the Web TimeSheet Integration Manager for Microsoft Project:

- **Automatic updates** (Microsoft Project Server only)  
Users can now schedule regular, automatic updates between Web TimeSheet and Microsoft Project Server. When enabled, the update will automatically occur at the specified time using the settings saved in the selected configuration file. Multiple updates can be scheduled to occur at different times and using different data transfer settings.
- **New mappings for transferring rate data**  
A Web TimeSheet user's **Hourly Cost**, **Hourly Payroll**, or the **User Rate** assigned for a particular project can be mapped to the **Standard Rate** field for the corresponding resource in Microsoft Project.
- **Ability to select data for transfer based on a relative time period**  
Users can now configure updates to use a relative time period, rather than one defined by specific dates. When using this feature, users will not need to adjust the date each time a transfer is performed. The transfer will automatically be adjusted to use data from the current or previous week, depending on the option selected.
- **Option to transfer only new and changed time data**  
Users can now choose to transfer all time cells matching the selected criteria or only those which have been added or changed since the last transfer.

## Compatibility Chart

The table below indicates which versions of Web TimeSheet and Microsoft Project are required to work with this version of the Integration Manager.

Integration Manager File	Microsoft Project Version	Web TimeSheet File
MSPServerAdmin26.exe	Server 2003	Version 6.5 and higher, including: <ul style="list-style-type: none"><li>• WTS65acs.exe</li><li>• WTS65acs_nodrv.exe</li><li>• WTS65sql.exe</li><li>• WTS65ora.exe</li><li>• WTS65msde.exe</li></ul>
MSPStdProAdmin26.exe	Standard 2002/2003	
	Professional 2002/2003
