What's New in Web TimeSheet Integration Manager for QuickBooks Version 2.5

The following new features are available in version 2.5 of the Web TimeSheet Integration Manager for QuickBooks:

- **Performance enhancements**
Enhancements have been made to the Integration Manager to improve performance. This has been achieved by processing only transfer-relevant timesheets, and not sorting through the entire timesheet inventory. This will result in saved network time and increased performance.
- **Ability to transfer Time Entries based on User**
Time entries can be selected for transfer based on user, as well as based on project/task. The **Based on User** option includes Web TimeSheet data filters for department, supervisor and employee type.

Fixed in Version 2.5

A number of previously known issues have been fixed in version 2.5. The fixed items include:

- You have the ability to map a Web TimeSheet client-type user defined field to the **Bill Address** field for QuickBooks. (47296)
- Tax amounts for **Expenses** and **Invoices** are rounded off to 2 decimal places when using the Integration Manager to transfer to QuickBooks. (47563)
- The Integration Manager ignores Web TimeSheet user defined field and **Payroll Items** mappings if the **Use time data to create paychecks** option is not checked for a user in QuickBooks. (47596)
- When transferring time entries using the **Project/Role → Job/Item** structural relationship, the Integration Manager logs a warning message if the billing column in the timesheet row is not a valid role rate. (47599)

- A data filter has been added to **Expense Entries** transfer to select only those entries that have not previously been transferred. (46772, 47850)
- Modified data that has previously been transferred from Web TimeSheet to QuickBooks is not updated when **Not Previously Transferred** option is selected, preventing duplication or overwriting. (46672, 46908)

Compatibility Chart

The table below indicates which versions of Web TimeSheet and Intuit QuickBooks are required to work with this version of the Integration Manager.

Integration Manager File	QuickBooks Version	Web TimeSheet File
QBIntegration25.exe	Intuit QuickBooks (US) 2004, 2005, 2006	Version 6.7 and higher, including: <ul style="list-style-type: none">• WTS67acs.exe• WTS67acs_nodrv.exe• WTS67sql.exe• WTS67ora.exe• WTS67msde.exe
	Intuit QuickBooks (US) Enterprise Solutions 6.0	
	Intuit QuickBooks (CDN) 2005 and 2006
