Fixed in Version 7.2, Service Release 2

The following issues are fixed in Service Release 2 for Version 7.2 of Web TimeSheet:

- PDF versions of dynamic reports are now created successfully when report data is filtered by a disabled user-defined field. (54612)
- Expense receipts can be uploaded for expense codes containing a forward slash character ("/"). (54611)
- Corrected dates used when a relative time frame, such as **This Year** or **Last Month**, is selected to filter data in dynamic reports. (54805)
- Currency is provided in a column separate from the amount in CSV versions of dynamic reports, allowing users to open the file in Microsoft® Excel®. (54393)
- Addressed issues with upgrading Oracle databases. (54573, 54905)
- Updated **Guided Setup** to prevent access to expense and timesheet periods pages if user does not have appropriate permissions. (54622, 54624)
- Allowed expense codes can now be updated in a project without error. (54392)
- Resolved JavaScript error encountered when sending an offline timesheet containing a required user-defined field. (54580)
- On the **List Users** page, when the user selects <all> from the **Department** search filter, a department tree containing all departments now displays in the pop-up window. (53993)
- The **Timesheet Status Details** report can now be consistently generated with hierarchy filtering enabled without an error occurring. (54413, 55067)
- After enabling the **Add more** checkbox and adding a user on the **Add New User** page, users can now add additional users without an error occurring. (53908)
- Users can now create a new non-Unicode project with a unique name based on an existing project without a "Name cannot be duplicated" error occurring. (53923)

- Time Off request entries made by a user who belongs to multiple departments are no longer duplicated in migrated or upgraded databases. (55010)
- Filters on the **Historical Timesheets** page now consistently return all appropriate records for each list page. (55066)
- Projects can now be created more than once based on an existing project template without an error occurring. (55094)
- Approval history pages are now properly displayed when a user's name includes an apostrophe. (54175, 54910)
- All characters, including the British Pound symbol – £, now display correctly after being exported to PDF. (55084)
