Fixed in Version 7.2, Service Release 1

The following issues are fixed in Service Release 1 for Version 7.2 of Web TimeSheet:

- Resolved issues with generating dynamic reports and saving timesheets when using a localized version of Windows. (54258, 54633, 54631)
- When adding a project using the **Based On** feature, the actual hours and start and end dates are no longer carried over from the source project. (54388, 54262, 54659)
- Project codes are now properly displayed in timesheets after upgrading to 7.2. (54418)
- Removed limitations on list provided for **Select specific...** option in dynamic report filters. (54673)
- External users can now run the default **Time Off** pivot report. (54197)
- Report attachments now open successfully when used with e-mail account types such as Hotmail. (54053)
- Time off requests shown in **Approvals** pages are no longer duplicated after upgrade or if users belong to multiple departments. (54051, 54470)
- Issues related to upgrading from a 7.1 installation have been resolved. (54236, 54225, 54238)
- Clarified column and filter name for approval status in **Time Off Details** report. (53710)
- Addressed issues with accessing select pages from the **Guided Setup**. (54086, 54402, 54539, 54452)
- **Next** and **Previous** links are now provided consistently in approval lists that span multiple pages. (54220)
- Defaults specified for user-defined fields are no longer applied to existing projects and tasks, only to those added after the default is specified. (54397)
- Addressed error that occurred when backing up a SQL Server Express database using the backup utility. (52993)
- During installation, users can now connect to non-English SQL Server Express installations using Windows NT authentication (54629)
- Resolved issues with generation of dynamic reports, including those configured to display a filter for a drop-down user-defined field or when **Current Timesheet Period Of This Year** is selected for a date filter. (54350, 54401, 54359)
