Fixed in Web TimeSheet 5.8 SR2

The following previously known issues are fixed in Web TimeSheet 5.8 SR2.

Functional Area	Description of Fixed Issue
Browser	<p>39282 & 39269</p> <p>Web TimeSheet pivot reports and offline expense sheet may not function correctly using Netscape or Firefox browsers.</p> <p>Workaround: If you are using any of these features, you should only use Internet Explorer as your browser.</p>
Data Base Migration	<p>37577</p> <p>Following the migration of an Access data base to an Oracle data base, an Inconsistent Datatypes error was generated.</p>
E-mail	<p>39240</p> <p>Batch e-mail notifications were not being sent.</p> <p>39217</p> <p>A MAPI error message was being displayed on systems that did not use MAPI.</p> <p>39207</p> <p>SMTP settings verification did not function correctly.</p> <p>39090</p> <p>E-mail notifications contained the Reply To email address in two locations.</p>

Functional Area	Description of Fixed Issue
Expenses	<p>39109</p> <p>There were inconsistent label names for the same data field in different places in the expense sheet.</p> <p>34633</p> <p>The sample data base contained errors that prevented expense sheets from being saved under certain circumstances.</p>
Integration Manager for MS Project	<p>38058</p> <p>Following the installation of Web TimeSheet and MS Project Link, MS Project Link was not centered on the screen.</p>
Projects	<p>39185</p> <p>When running Web TimeSheet with an Oracle data base, adding a new client returned a server error under some circumstances.</p> <p>38896</p> <p>Project and Task names were limited to 55 characters. This caused characters to be dropped when importing from many other applications where the name limitation was greater than 55 characters. The Project and Task names can now be up to 255 characters long.</p>
QuickBooks	<p>39243</p> <p>The preview popup in the QuickBooks XML module did not display some images correctly.</p> <p>37964</p> <p>When transferring data to QuickBooks using Web TimeSheet Integration Manager for QuickBooks XML, the mapping of Role to Item did not take account of the possibility of sub-items and the character limitations imposed by QuickBooks.</p>
Reports	<p>39355</p> <p>When attempting to run a Detailed (User Group) report, the graphics for the Advanced Filters>Advanced User Group Query Setup were not displayed.</p> <p>39322 & 39265</p> <p>Attempts to generate various Project Status reports resulted in a server error.</p>

Functional Area	Description of Fixed Issue
Reports (continued)	<p>39262 Attempts to generate Project Status Summary reports that included User Defined Fields resulted in a server error.</p> <p>39205 & 39149 When running a Detailed (Task User) report, a server error was returned if certain Group By settings were selected.</p> <p>39143 When running different views of reports for the same project, the roll-up of hours was different.</p> <p>39097 When running a Project Status Summary report, not all the User Defined Fields were displayed.</p> <p>39030 Attempts to generate a Timesheet Detail (Own) report returned a server error.</p> <p>39024 When attempting to run a Timesheet>Audit Trail report, the Modified By column contained false data.</p> <p>38971 When attempting to run a Project Status report, The task name appeared twice.</p>
Timesheet	<p>39150 When comments were entered and saved for Time Off, the comments appeared in the incorrect comments column.</p> <p>39062 When performing an Add/Remove Tasks function, the Add/Remove Projects/Tasks pop-up defaulted to opening with all the tasks and subtasks expanded. This pop-up now opens with the last saved setting of tasks and subtasks (expanded or collapsed).</p> <p>37800 Offline timesheets could not be saved locally after the data had been modified.</p>
